### 1. Class/Seminar Teacher Evaluation

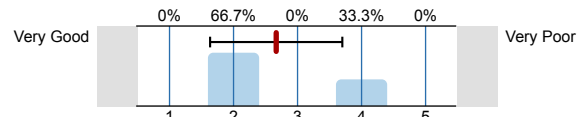

This survey requests your feedback on two separate aspects of your learning experience, split into three sections. The first section asks for your views on your teacher's class/seminar teaching. The second section (overleaf) asks for your views on the course as a whole *at this point in time*. Finally, the third section asks for some information about you, to aid analysis.

Your responses will be used to identify areas of good practice. They will also be used to help improve the teaching and learning experience for you and your peers. Please complete the survey thoughtfully and constructively, marking one box for each question unless indicated otherwise.

Please rate your class/seminar teacher on the points below using the following scale:  
(1 – very good, 2 – good, 3 – average, 4 – poor, 5 – very poor, not applicable)

1.10) Please write below aspects of this teacher's class/seminar teaching that you think could be improved and/or aspects that were particularly helpful.

*Unclear explanations*

*In terms of organisation, could be better managed since we often run out of time before we finish all the classwork.*

*Manage time a bit better so we do not need to rush at the end.*

More contact with students.

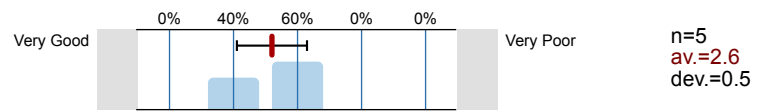

More structure in writing things down on the board.

Hard to realise what is important and what can be left out at the exam.

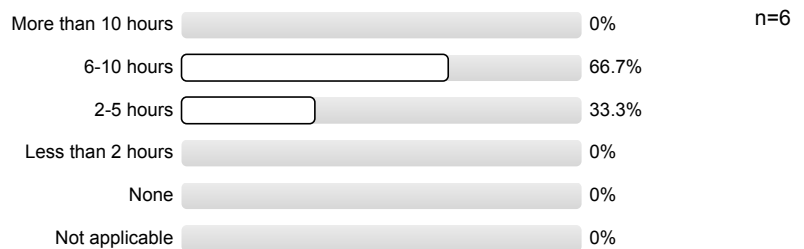

This course is very hard, ~~and the book is~~ the book is poorly written and the teacher is trying to explain but sometimes it lost as well.

Lectures ~~are~~ do not prepare you at all for the assignments

-Make sure classworks are linked to lectures.

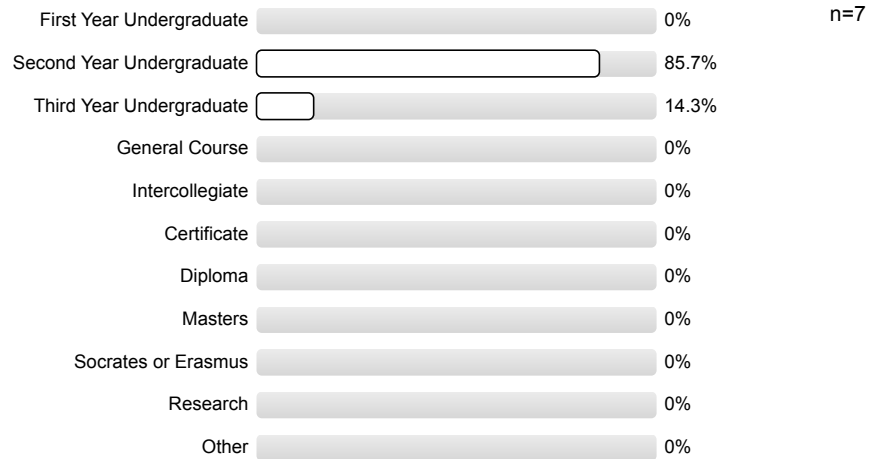

Release lecture recordings every week instead of half way through the course, it is very hard to catch up once you fall behind especially when the materials are challenging.

More examples during lecture or class. This course is claimed to be more mathematical. But with no examples it is very hard to calculate :)
